tech sheet

ATE INDUSTRIAL CLEANER

ATE Industrial Cleaner is a blend of proprietary solvents used to remove tar, wax, grease and adhesives from vehicles. ATE Industrial Cleaner's unique blend of solvents make it strong enough to rip through tar and grease, yet it is mild enough to not harm plastic or paint.

Easy to use, fast working and safe for paint & plastic is the reason why ATE Industrial Cleaner is our most popular body prep solvent. ATE Industrial Cleaner is very versatile. It competes with almost every dressing on the market. Just dilute with water to achieve desired shine / price point. For Example, add 20% water to ATE Industrial Cleaner to compete against Super Dress It and Knock Out. Add 30% water to compete against Dress It and TKO.

Special Tips and Precautions

- Do not mix with other products.
- Make sure customers are equipped with gloves, rubber aprons and use proper ventilation.
- Use to remove gum and oil spots before shampooing carpets and upholstery.

Key Features

- Paint, glass and fabric safe.
- Great for removing window sticker glue.
- Excellent for removing excess cosmoline left in door jams and engine compartments.
- Excellent adhesive remover for limousine manufacturers and other shops where custom interiors are installed.
- Removes Formica/Linoleum floor adhesive.
- Removes excess adhesive after windshield repair.
