

Bacto Ban Sanitizer Usage Guide

Description and Uses:

Bancto-Ban Sanitizer is an E.P.A. registered detergent, disinfectant & sanitizer. It is an All Purpose Cleaner that also disinfects hard surfaces such as walls, floors, sink tops, toilet bowls, operating rooms & patient care facilities. Use Bacto-Ban in meat packing plants, veterinarian offices, hospitals, restaurants, mortuaries and anyplace where a surface needs to be sanitized.

For general disinfectant, mix 4.5 ounces of Bacto-Ban to 1 gallon of water. For hospitals, mix 6 oz. of product to 1 gallon of water. For sanitization, mix 8 oz. of product to 5 gallons of water.

Advantages:

- Multi-purpose disinfectant
- E.P.A. registered #1839-50
- Use on any hard surface to clean and kill bacteria, algae, fungus, mildew & viruses.
- Non Caustic Formula.
- Sell to Vets, hospitals, restaurants, institutions, meat packing plants, supermarkets, etc.
- Very versatile depending on dilution

Special Tips and Precautions:

- Follow directions for proper dilution
- Allow to dwell on surface for 10 minutes to effectively kill all bacteria.
- Also a deodorant. Actually kills odor causing bacteria.
- Effective on bacteria & fungi even in the presence of organic soil (5% blood serum).
