Cyclone Aircraft Cleaner

Cyclone exterior aircraft cleaner is specifically formulated to remove grease, grime, hydraulic fluid, jet exhaust and other contaminants from aircraft.

Cyclone uses the latest "green" technology to create a safe and effective cleaner without the use of Caustics, Acids, Solvents, HAPs (Hazardous Air Pollutants) or APE's (AkyI-Phenol Ethoxylates) which are commonly used in competitive products.

Cyclone is VOC free, solvent free, and readily biodegradable. It exceeds all Federal and State regulations.

In addition to being environmentally safe, Cyclone is highly concentrated. This allows customers to save money. Why ship water when the customer can dilute cyclone themselves?

These advantages make Cyclone the product of choice for airlines, military and private owners to maintain their aircraft.

Directions

1. Dilute Cyclone with water to achieve desired strength.
2. Apply to aircraft and scrub with a soft brush or scrub pad. Rinse with spot-free water.

Strength	Ratio
Heavy Duty Cleaning & Degreasing	4 to 1
Medium Duty Cleaning	8 to 1
Maintenance Cleaning	20 to 1
Light Duty Cleaning	30 to 1

Key Features

- Highly concentrated
- Biodegradable
- No VOC's
- No solvents acids or caustics
- No APE's
- No HAP's

Specifications

Cyclone has been tested by an independent lab and exceeds the following specifications:

- Boeing D6 - 17487 Revision P
- Douglas Aircraft CSD No. 1 - Type I
- Mil - PRF- 87937D Type II & Type IV
- AMS 1526 B's
