Vinyl & Leather protectant

Part of our sealant program. VLP is a polymer based coating that protects all of the vinyl, leather and plastic surfaces on the interior of the vehicle.

VLP is specifically designed with curable polymers to provide a low shine, non-greasy protective layer that will last for years.

The curable polymers actually cross-link and attach to the surface which creates a clear, micro-thin layer of protection.

It will protect against UV damage, smog, and other elements to keep your vehicle looking new.

VLP is a zero-VOC formula. It exceeds all State and Federal regulations. It does not contain any HAPs or other harmful ingredients.

Directions

1. Clean area using the appropriate cleaning product to remove grease, grime and dirt.
2. Wipe VLP sparingly onto interior surfaces using a clean cloth or applicator pad.
3. Allow VLP to dry

Do not use on surfaces where slipperiness may be dangerous. Do not use on brake pedals, steering wheels, and other control surfaces.

Key Features

- Long-Lasting
- Non-greasy shine
- Water-based formula
- Product contains zero VOCs
- Perfect for all interior surfaces
- Protects by using curable polymers
- Exceeds all State & Federal regulations
